Experience

Kinetik Healthcare

Software Engineer 2

2025-04-01 – Present

- Enhanced realtime notification pipeline with push based mechanism with **Redis Pub/Sub**, **CDC**, **Redis Streams**
- Migrated legacy code from **Express JS** to **Nest JS** for cleaner domain driven design
- Enhanced existing **RBAC** system
- Investigated production incidents based on logs and traces from **CloudWatch** and **Grafana**
- Built **Florence** an **AI voice assistant** which handles around 80 percent of our ride initiation requests
- Developed internal **VoIP** testing tools for simulating calls for the voice agent
- Built a source control pipeline to manage **11Labs agent as code**
- Managed **CI/CD pipeline** for deploying agent
- Integrated Intercom based human agent call center with AI call center for transferring calls as fallback
- Built **Grafana dashboard** for monitoring the AI agent performance
- Contributed in **Langgraph** based orchestrator service for a large scale **AI Agent**

PropertyFinder

Software Engineer

2024-10-01 – 2025-10-31

- Managed reliability of **Golang** based B2B platform
- Monitored **AWS** resource and infrastructure
- Collaborated with data team on data discrepancy issues during migration
- **Investigated and fixed critical production incidents** based on metrics, logs and traces in **Grafana**
- Written **Golang** scripts for data fix and migration
- Built new features and enhanced existing features with **Golang**, **Lambda**, **ECS**
- Built async pipelines with **SQS**, **Kinesis Streams**, **Step functions**
- Performed **load testing** and monitored the metrics in **Datadog** dashboard for new feature implementations
- Set alerts in **Grafana** with **slack integration**

Learnyx AI

Fullstack Engineer

2023-10-01 – 2025-02-01

- Built API service with **Nest JS**
- Built service for handling AI heavy workload with **FastAPI**, **Langchain**
- Offloaded heavy generation workload to asynchronously with ***RabbitMQ***
- Integrated **Langfuse** for LLM observability
- Built front-end with **React JS**, **Next JS**, **Vite**, **TanStack Query**
- Participated in business decisions from technical point of view with business stakeholders
- Mentored a small team of 2-3 people on different architectures and best practices
- Managed containerized self hosted infrastructure in **AWS EC2** with **Cooolify**
- Built a locally hosted infrastructure with **Docker** exposed with **Ngrok** for staging integration testing

Education

Shahjalal University of Science and Technology

Bachelors of Science in Computer Science

2019-01-01 – 2024-04-01

Certifications

Fundamentals of Operating Systems

Udemy

<https://www.udemy.com/certificate/UC-ff0d44a3-8917-40cd-ae9f-a01e258aee49/>

Learned about Process structure, Memory managment, CPU cycles, I/O management

NodeJS Internals and Architecture

Udemy

<https://www.udemy.com/certificate/UC-2068cbe0-b17c-47ca-b298-d8acb94b30e2/>

Learned about internal architecture of node js, event loop, node js worker threads, enhancing node js app performance
