Video Introduction:

Skills

LLM API Integration, RAG, MCP, LangChain, Machine Learning, Deep Learning, Next.js, React.js, Redux, JavaScript, HTML, CSS, Tailwind CSS, Material UI, Node.js, Express.js, Python, C, C++, Java, MySQL, PostgreSQL, Oracle, MongoDB, Git, GitHub, Docker

Education

Bangladesh University of Engineering and Technology

Bachelor of Science in Computer Science and Engineering

2020-02-01 – 2025-03-01

Experience

OpenRefactory, Inc.

Software Engineer

2025-08-01 – Present

- Led the implementation of a core security feature—Root Cause Analysis—for identifying functions directly responsible for CVEs by analyzing commit histories across multiple sources.
- Applied LLM-based code understanding to correlate commits, functions, and vulnerability severity, improving accuracy of package security assessment.
- Contributed to multiple full-stack features for the Project Clean Beach product, working across frontend, backend, and database layers.
- Worked with Next.js, Python, and PostgreSQL to develop production-grade security and full-stack features.

ACS Future School

Full-Stack Software Developer

2025-04-01 – 2025-07-01

- Designed and implemented end-to-end features including threaded comments, notifications, ticketing systems, and admin dashboards using Next.js and PostgreSQL.
- Designed scalable REST APIs and optimized PostgreSQL schemas to support growing user and admin workflows.
- Collaborated with stakeholders to translate product requirements into production-ready features.
- Worked with Next.js, Node.js, Express.js, and PostgreSQL.
